

Toggle Clamps

- Vertical clamps are the most popular type of toggle clamp, the arm and handle rotating in the same direction and high clamping force being generated.

- Main components are zinc plated and passivated steel. Rivets are stainless steel, setscrews are chemi-black coated steel.

Vertical Manual Clamps, Flanged Base

Pull Back Clamp, Flanged Base

- This clamp is unique in having an action similar to a wide-opening locking pliers, but having a flanged body which can be fastened to the fixture or mould against which the work-piece or mould half is to be clamped.
- Pressed components are of zinc plated and passivate steel. Rivets are stainless steel.
- Supplied with setscrew and nuts.
