

Toggle Clamps

- Horizontal Clamps are usually used where height restrictions prevent the use of a vertical clamps, or where the action of the clamping arm and handle rotating in opposite directions is more suitable.

- Main components are of zinc plated and passivated steel and rivets are stainless steel.
- Latch Clamps are available in two configurations Horizontal with the clamp and latch bracket in the same plane or Vertical where the clamp and the bracket being at right angles to each other.

- All components are of zinc plated and passivated steel. Rivets being stainless steel. With hardened parts and bushes.
