

Eye Protection

Eye Protection

The next generation in safety eyewear.

- Duo-component technology combines hard and soft materials to provide excellent protection and superb wearer comfort
- An Optical Class 1 duo-spherical lens, with a base 9 curve, gives the highest optical quality with outstanding peripheral vision and all round protection
- Quattroflex comfort pads give increased comfort in pressure areas; nose, brow and behind ears
- Fully adjustable temple length and lens inclination for an individual fit
- Maximum UV protection. Approved to EN 166 1F KN
- Available in a choice of lens options:
Clear Supravision HC-AF lens coated for anti mist and anti scratch.
Brown SCT Optidur 3000 easy clean lens for extreme scratch and chemical resistance.

Heavyweight performance from the world's lightest safety eyeshield, using high-tech polymers & XST technology.

- Weighs only 18 grams
- XST frames for high levels of comfort & non-slip fit
- Adjustable nose bridge & side arms for a perfect fit across a wide range of faces
- Improved peripheral vision

- No metal parts or hinges
- Wide choice of lenses, including:
Amber for contrast enhancement.
Grey for sunlight & glare.
Silver Mirror for wearers who move between light & dark areas, ideal for fork-lift drivers & construction workers.
Approved to EN 166 1F.
