

Equal Union BSP to BSPT

Equal Union BSP to BSPT

Features:

- High Working Pressure
- Mild Steel - High Grade Material
- Sealing face and threads machined to high tolerance
- High Level Corrosion Resistance Plating (CR3 compliant)
- Bonded Seal Centring Cone
- High Level Corrosion Resistance CR3 Plating
- Available in Stainless Steel 316 or Cupro Nickel

Benefits:

- Highly resistant to leakage even under severe vibration, pressure pulsation and temperature
