

# Protective Hose Sleeves

## Hose Protection Sleeve

- The most economical option for managing, containing and protecting your hoses, cables and other equipment.
- A light duty, basic sleeve, made of abrasion-resistant nylon.
- Thickness of .090 +/- .020". Provides limited burst protection.
- Applications include protection for hose assemblies, rope and wire harnesses and covering swinging chains to prevent them from causing damage to their environments.
- Abrasion resistance minimally 50,000 cycles.

### Sizes and Specs

- Available in multiple widths up to 5.76" nominal I.D
- May be printed with customer name/logo, part number or MSHA I.D number
- UV stabilized using carbon black, the proven standard.
- Bulk nylon is entangled to enhance abrasion resistance. Material is Nylon 6.
- Highly abrasion resistant-meets or exceeds ISO 6945 abrasion standard, minimum 50,000 cycles.
- Approved by MSHA for use in underground mines, IC 171/1.
- Standard product is black. Melting point 419F-430F
- Very good chemical compatibility with gasoline, oil, mineral and vegetable oil, alcohols, diluted bases, benzene, acetone, ether, carbon tetrachloride, chlorine-based solvent
- Good chemical compatibility with diluted acids.
- Resists mildew and bacterial growth. Non-toxic. Excellent resistance to UV, aging.
